

## NFIB Nevada Small Business Day – May 8, 2023

### 2023 Legislative Priorities

#### Legislation NFIB Opposes:

**AB 312** establishes an “Environmental Justice Commission” that could stifle future growth and development and make every public and private construction project more expensive.

**SB 427** implements new heat protection standards in the workplace using vague definitions and a one-size-fits-all standard.

**SB 305** creates a mandatory retirement program for private sector employees. Employers would be required to administer employee enrollment and would also be subjected to fines and penalties for errors and paperwork mistakes.

#### Legislation NFIB Supports:

**AB 50** gives the Attorney General additional tools to address organized retail crime.

**AB 14** ensures that the Secretary of State’s Silver Flume business portal is better connected to local government online licensing systems.

**SB 24** makes the Lt. Governor’s Office of Small Business Advocacy permanent.

**SB 261** improves notification requirements when local governments are proposing new regulations that affect small businesses.

**AB 77** creates an Office of Entrepreneurship within the Governor’s Office of Economic Development.

**SB 233** reforms existing tax structure for companies who lease heavy equipment to other companies to make it more stable and efficient.

NFIB also supports several of Governor Joe Lombardo’s policy goals, including but not limited to, creating communities that are safe for prosperity and investment; reforming state government to be efficient, responsive, and fiscally responsible; and reducing Nevada’s tax burden on small businesses and local job creators.
