NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index decreased 1.1 points in April to 89.0. This is the sixteenth consecutive month below the 49-year average of 98. The last time the Index was at or above the average was December 2021. Of the 10 index components, 4 increased, 6 decreased. Twenty-three percent of owners reported that inflation was their single most important problem in operating their business, down 1 point from last month and 14 points lower than last July's highest reading since 1979 Q4. Owners expecting better business conditions over the next six months declined 2 points from March to a net negative 49 percent, although 12 percentage points better than last June's reading of net negative 61 percent. Forty-five percent of owners reported job openings that were hard to fill, up 2 points from March. The net percent of owners raising average selling prices decreased 4 points to a net 33 percent seasonally adjusted. The net percent of owners who expect real sales to be higher deteriorated 4 points from March to a net negative 19 percent.

LABOR MARKETS

Forty-five percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, up 2 points from March. Thirty-seven percent have openings for skilled workers (up 3 points) and 19 percent have openings for unskilled labor (unchanged). The difficulty in filling open positions is particularly acute in the construction, transportation, and manufacturing sectors. Openings are lowest in the finance sector. Owners' plans to fill open positions remain elevated, with a seasonally adjusted net 17 percent planning to create new jobs in the next three months, up 2 points from March but 15 points below its record high reading of 32 reached in August 2021. Overall, 60 percent reported hiring or trying to hire in April, up 1 point from March. Fifty-five percent (92 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (up 2 points). Twenty-nine percent of owners reported few qualified applicants for their open positions (up 3 points) and 26 percent reported none (down 1 point).

CAPITAL SPENDING

Fifty-six percent reported capital outlays in the last six months, down 1 point from March. Of those making expenditures, 40 percent reported spending on new equipment (unchanged), 23 percent acquired vehicles (unchanged), and 11 percent spent money on new fixtures and furniture (unchanged). Fifteen percent improved or expanded facilities (unchanged) and 6 percent acquired new buildings or land for expansion (unchanged). Nineteen percent plan capital outlays in the next few months, down 1 point from March and historically very weak.

This survey was conducted in April 2023. A sample of 10,000 small-business owners/members was drawn. One thousand three hundred sixty-five (1365) usable responses were received — a response rate of 13.7 percent.

SALES AND INVENTORIES

A net negative 9 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, down 3 points from March. The net percent of owners expecting higher real sales volumes deteriorated 4 points to a net negative 19 percent. The net percent of owners reporting inventory increases declined 6 points to a net negative 7 percent. Not seasonally adjusted, 13 percent reported increases in stocks (unchanged) and 19 percent reported reductions (up 2 points). Eighteen percent of owners recently reported that supply chain disruptions still have a significant impact on their business (down 1 point). Another 31 percent reported a moderate impact (unchanged), and 37 percent reported a mild impact (up 2 points). A net negative 5 percent of owners viewed current inventory stocks as "too low" in April, down 6 points from March. By industry, shortages are reported most frequently in manufacturing (10 percent), agriculture (9 percent), retail (9 percent), and wholesale (8 percent). A net negative 5 percent of owners plan inventory investment in the coming months.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 40 percent reported raising compensation, down 2 points from March. A net 21 percent plan to raise compensation in the next three months, down 1 point from March. Nine percent cited labor costs as their top business problem, down 2 points from March. Twenty-four percent said that labor quality was their top business problem (up 1 point). Labor quality was the top business problem, with inflation in second place by 1 point. The frequency of reports of positive profit trends was a net negative 23 percent, 5 points worse than March. Among owners reporting lower profits, 29 percent blamed weaker sales, 20 percent blamed the rise in the cost of materials, 13 percent cited the usual seasonal change,10 percent cited labor costs, 9 percent cited lower prices, and 4 percent cited higher taxes or regulatory costs.

CREDIT MARKETS

Two percent of owners reported that all their borrowing needs were not satisfied (unchanged). Thirty percent reported all credit needs met (up 1 point) and 59 percent said they were not interested in a loan (unchanged). A net 6 percent reported their last loan was harder to get than in previous attempts (down 3 points). Four percent reported that financing was their top business problem (up 1 point). A net 26 percent of owners reported paying a higher rate on their most recent loan, unchanged from March. The average rate paid on short maturity loans was 8.5 percent, 0.7 percentage points above March and the highest since October 2007. Thirty-one percent of all owners reported borrowing on a regular basis (up 1 point)

INFLATION

The net percent of owners raising average selling prices decreased 4 points from March to a net 33 percent seasonally adjusted, the lowest since March 2021. Unadjusted, 12 percent (up 1 point) reported lower average selling prices and 48 percent (down 2 points) reported higher average prices. Price hikes were most frequent in construction (59 percent higher, 7 percent lower), retail (59 percent higher, 8 percent lower), wholesale (54 percent higher, 14 percent lower), and finance (52 percent higher, 5 percent lower). Seasonally adjusted, a net 21 percent plan price hikes (down 5 points).

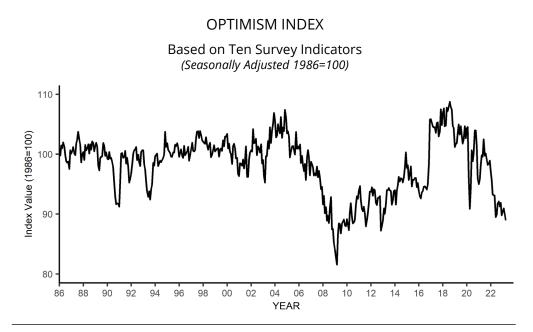

COMMENTARY

The economy continued to slow in the first quarter, growing at a 1.1% annual rate. Consumer spending was unexpectedly strong, which will support labor demand. Consumption added 2.5 points to the growth rate. Unfortunately, most of that spending was satisfied by inventory reductions (-2.3 points), stuff made in prior quarters and so not production and income generation in the first quarter. Residential construction posted a minor decline. Several large banks failed, blamed on poor risk management. Deposits had grown dramatically as the government poured massive Covid relief into the economy. These deposits are "hot money," they can be withdrawn in 24 hours. The failure of Silicon Valley Bank started it all off, triggering other bank failures.

From a wider perspective, the Fed created the problem. Afraid of deflation, it kept interest rates low for years, setting an inflation target of 2%. Businesses and consumers made investment and spending decisions based on these low rates. When inflation broke out in 2020, the Fed suddenly started rapidly raising rates, from 0% to 5% while the government poured out trillions of dollars to firms and consumers (Covid relief, PPP, etc.). The stock market took off, housing prices soared along with most variable price assets. Now, the economy appears to be slowing. That will mean that the Fed will be under pressure to cut rates to stimulate the economy and support employment, more distortions in financial markets. This is not a natural cycle, it is one created by government policies. No one knows what interest rate the market would set, it's always being manipulated.

While savers are happily receiving higher interest returns, borrowers are facing higher credit costs. And businesses borrowing to finance expansion or equipment are paying higher financing costs. If the economy sinks into a recession as many expect, owners will be whipsawed again. The President wants to be able to borrow as much money as he needs to implement all of his programs. But the cost of that debt has risen dramatically, and every Treasury bond that matures these days is replaced with one bearing a much higher interest rate. Talk of default on Treasury debt is nonsense as tax revenues are many times larger than interest cost. But as the interest bill rises, other domestic spending will be squeezed out.

A banking crisis does not appear to be a major risk. The bank failures were not due to bad loans, the usual cause. Defaults will rise as the economy weakens but hopefully not at pandemic levels. The manufacturing sector appears to be in contraction (ISM <50). The service sector is still in growth mode, but much weaker (ISM 51.2, down 3 points). Main street firms have been pessimistic for the last 18 months, with the NFIB Optimism Index at 89 (49 year average = 98). Price raising activity has slowed but remains historically high, and reports of higher labor compensation are sticky at historically high levels. This will make inflation sticky as labor costs are the major operating cost of small firms, especially in the service sector. The economy seems inclined to slow down and this will make raising prices harder and slow inflation. Maybe it's time for the Fed to pause and let nature (markets) take its course.

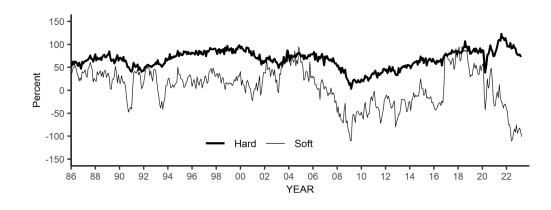

OPTIMISM INDEX

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	5
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	6
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	7
If higher or lower, what is the most important reason?	7
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	8
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	8
How are your average selling prices compared to three months ago?	9
In the next three months, do you plan to change the average selling prices of your goods and/or services?	9
During the last three months, did the total number of employ in your firm increase, decrease, or stay about the same?	
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	10
Do you have any job openings that you are not able to fill right now?	
In the next three months, do you expect to increase or decrease the total number of people working for you?	11
Over the past three months, did you change the average employee compensation?	12
Do you plan to change average employee compensation during the next three months?	12

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Areloans easier or harder to get than they were three months ago?	13
During the last three months, was your firm able to satisfy its borrowing needs?	14
Do you expect to find it easier or harder to obtain your required financing during the next three months?	14
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	15
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	15
During the last three months, did you increase or decrease your inventories?	16
At the present time, do you feel your inventories are too large, about right, or inadequate?	16
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	16
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	17
If [your firm made any capital expenditures], what was the total cost of all these projects?	18
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	. 18
What is the single most important problem facing your business today?	19
Please classify your major business activity, using one of the categories of example below	. 20
How many employees do you have full and part-time, including yourself?	20
