NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index decreased 2 points in January to 89.9. This is the 25th consecutive month below the 50-year average of 98. The last time the Index was at or above the average was December 2021. Of the 10 index components, 2 increased, 6 decreased, and 2 were unchanged.

LABOR MARKETS

Thirty-nine percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, down 1 point from December and the lowest reading since January 2021. Thirty percent have openings for skilled workers (down 3 points) and 15 percent have openings for unskilled labor (up 1 point). The difficulty in filling open positions is particularly acute in the construction, manufacturing, and non-professional services sectors. Job openings in construction were down 11 points from last month but almost half have a job opening they can't fill. Openings were the lowest in the professional services and finance sectors. Owners' plans to fill open positions continue to soften, with a seasonally adjusted net 14 percent planning to create new jobs in the next three months, down 2 points from December and the lowest level since May 2020. Overall, 55 percent reported hiring or trying to hire in January, unchanged from December. Forty-nine percent (89 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (unchanged). Twenty-six percent of owners reported few qualified applicants for their open positions (down 2 points) and 23 percent reported none (up 2 points). Reports of labor quality as the single most important problem for business owners increased 1 point to 21 percent, and labor cost rose 1 point to 10 percent.

CAPITAL SPENDING

Fifty-nine percent reported capital outlays in the last six months, up 1 point from December. A recovery in investment is needed to support an improvement in productivity, but this is unlikely to occur while owners remain pessimistic about future business conditions and lending standards tighten with high interest rates. Longer term, the worker shortage has given firms an incentive to invest in labor saving technology. But, overall, capital spending is not strong historically. Of those making expenditures, 40 percent reported spending on new equipment (unchanged), 25 percent acquired vehicles (up 3 points), and 17 percent improved or expanded facilities (down 2 points). Twelve percent spent money on new fixtures and furniture (up 1 point) and 7 percent acquired new buildings or land for expansion (up 2 points). Twenty-three percent (seasonally adjusted) plan capital outlays in the next few months, down 1 point from December. A more positive view of the future economy and economic policy would help stimulate longer term investment spending, but currently, owners' views about the future are not supportive and financing costs are very high. Investment is needed to address labor supply chain problems which still persist in the current environment.

SALES AND INVENTORIES

A net negative 11 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, unchanged from December. The net percent of owners expecting higher real sales volumes declined 12 points to a net negative 16 percent. The net percent of owners reporting inventory gains increased 2 points to 0 percent. Not seasonally adjusted, 13 percent reported increases in stocks (up 1 point) and 19 percent reported reductions (up 4 points). A net negative 4 percent of owners viewed current inventory stocks as "too low" (e.g. inventories are too large) in January, up 1 point from December. By industry, shortages are reported most frequently in the wholesale (18 percent), retail (12 percent), and finance (11 percent) sectors. Shortages were reported least frequently in the professional services (2 percent) and construction (4 percent) sectors. A net negative 3 percent of owners plan inventory investment in the coming months (more plan reductions than increases), up 2 points from December.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 39 percent reported raising compensation, up 3 points from December. A seasonally adjusted net 26 percent plan to raise compensation in the next three months, down 3 points from December. The frequency of reports of positive profit trends was a net negative 30 percent, 5 points worse than December, and a very poor reading. Among owners reporting lower profits, 32 percent blamed weaker sales, 15 percent blamed the rise in the cost of materials, 15 percent cited usual seasonal change, and 11 percent cited labor costs. For owners reporting higher profits, 49 percent credited sales volumes, 24 percent cited usual seasonal change, and 9 percent cited higher selling prices.

CREDIT MARKETS

Three percent of owners reported that all their borrowing needs were not satisfied (unchanged). Twenty-six percent reported all credit needs met (up 1 point) and 62 percent said they were not interested in a loan (up 1 point). A net 6 percent reported their last loan was harder to get than in previous attempts (down 2 points). Five percent reported that financing was their top business problem (unchanged). A net 18 percent of owners reported paying a higher rate on their most recent loan, down 2 points from December. The average rate paid on short maturity loans was 9.0 percent, down 0.8 of a percentage point from last month. Twenty-nine percent of all owners reported borrowing on a regular basis (unchanged).

INFLATION

The net percent of owners raising average selling prices declined 3 points from December to a net 22 percent seasonally adjusted. Fifteen percent reported lower selling prices, the highest since August 2020. Twenty percent of owners reported that inflation was their single most important problem in operating their business (higher input and labor costs), down 3 points from last month and 1 point behind labor quality as the top problem. Unadjusted, 15 percent (unchanged) reported lower average selling prices and 36 percent (unchanged) reported higher average prices. Price hikes were most frequent in wholesale (47 percent higher, 7 percent lower), retail (43 percent higher, 11 percent lower), services (43 percent higher, 6 percent lower), finance (42 percent higher, 14 percent lower), and construction (36 percent higher, 9 percent lower). Seasonally adjusted, a net 33 percent plan price hikes (up 1 point).

COMMENTARY

All eyes are on the Federal Reserve and how many rate cuts they might initiate this year. Given the strength of the economy, the Federal Reserve might prefer to leave rates where they are to fend off any inflationary forces that the late 2023 surge in the economy might produce. The real rate of interest will rise as inflation recedes. As inflation falls, the burden of a 5% interest rate rises because the financial markets can no longer earn profits to cover interest costs when they can't raise prices (as much as before). This is a justification for interest rate cuts which will keep the cost of credit from rising in real terms (which is what matters).

Inflation pressures from Main Street have declined by 50% since peaking in 2021. Wage cost pressures have also moderated significantly, although not as much as price hikes, a significant cost for labor intensive firms is easing. However, prices are now 20% higher than they were in 2020, an increase that strips the purchasing power out of the earnings of most workers. Prices are still rising and even if inflation reaches zero, consumers will have to live with higher prices. As Treasury Secretary Yellen said, most people don't think prices will fall (CNBC December 13, 2024). And if prices don't fall, most consumers will experience a permanent reduction in their real incomes as their wages will buy less than they did in 2020.

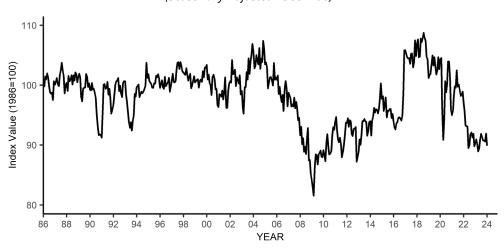

Growing debt and associated increases in delinquencies and loan losses pose a risk that can rapidly accelerate a downturn in economic activity. Most student loan recipients are not making payments on their loans, hoping that President Biden will cancel their obligations (and stick taxpayers with the \$6 trillion cost). Massive government spending, financed with new Treasury borrowing (at decades' high interest rates), powered the economy in 2023. Because of this massive spending, the debt grew and interest paid on the debt also grew, crowding out other government spending. One observer of the growing debt threat warned: "Debt-fueled booms all too often provide false affirmation of a government's policies, a financial institution's ability to make outsized profits, or a country's standard of living. Most of these booms end badly." (Endgame, 2011 John Mauldin).

Small business owners can't set economic policy, they can only respond to policy changes. Interest costs are still significantly higher, 9% on average compared to 5% in 2020. Labor costs are dictated by economic policies, inflation in particular. In 2020, an average 25% raised compensation compared to 40% last year. Tax policy remains uncertain and government agencies continue to spew out new regulations. But despite the headwinds, the consumer remains resilient, moving the economy forward. Hopefully this will be enough for the "soft landing" that we're all hoping for in 2024.

OVERVIEW - SMALL BUSINESS OPTIMISM

NFIB RESEARCH CENTER SMALL BUSINESS ECONOMIC SURVEY

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	5
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	6
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	7
If higher or lower, what is the most important reason?	7
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	8
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	8
How are your average selling prices compared to three months ago?	9
In the next three months, do you plan to change the average selling prices of your goods and/or services?	9
During the last three months, did the total number of employ in your firm increase, decrease, or stay about the same?	
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	10
Do you have any job openings that you are not able to fill right now?	11
In the next three months, do you expect to increase or decrease the total number of people working for you?	11
Over the past three months, did you change the average employee compensation?	12
Do you plan to change average employee compensation during the next three months?	12

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Areloans easier or harder to get than they were three months ago?	13
During the last three months, was your firm able to satisfy its borrowing needs?	14
Do you expect to find it easier or harder to obtain your required financing during the next three months?	14
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	15
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	15
During the last three months, did you increase or decrease your inventories?	16
At the present time, do you feel your inventories are too large, about right, or inadequate?	16
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	16
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	17
If [your firm made any capital expenditures], what was the total cost of all these projects?	18
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	. 18
What is the single most important problem facing your business today?	19
Please classify your major business activity, using one of the categories of example below	. 20
How many employees do you have full and part-time, including yourself?	20
