NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index increased 0.9 of a point in July to 91.9. Despite its improvement, this is the 19th consecutive month below the 49-year average of 98. The last time the Index was at or above the average was December 2021. Of the 10 index components, 5 increased, 1 decreased, and 4 were unchanged. Twenty-one percent of owners reported that inflation was their single most important problem in operating their business, down 3 points from last month and 13 points lower than last July's highest reading since 1979 Q4. July's reading was the lowest since November 2021. Owners expecting better business conditions over the next six months improved 10 points from June to a net negative 30 percent, 31 percentage points better than last June's reading of net negative 61 percent. This was the highest reading since August 2021 but historically very negative. Forty-two percent of owners reported job openings that were hard to fill, unchanged from June but remaining historically very high. The net percent of owners raising average selling prices decreased 4 points to a net 25 percent seasonally adjusted, still a very inflationary level but trending down. This is the lowest reading since January 2021. The net percent of owners who expect real sales to be higher improved 2 points from June to a net negative 12 percent, still a very dismal posture.

LABOR MARKETS

Forty-two percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, unchanged from June. Thirty-six percent have openings for skilled workers (up 1 point) and 18 percent have openings for unskilled labor (unchanged). The difficulty in filling open positions is particularly acute in the construction, manufacturing, and transportation sectors where compensation gains are more frequently reported. Openings are lowest in the professional and finance sectors. Owners' plans to fill open positions remain elevated, with a seasonally adjusted net 17 percent planning to create new jobs in the next three months, up 2 points from June but 15 points below its record high reading of 32 percent reached in August 2021. Overall, 61 percent reported hiring or trying to hire in July, up 2 points from June. Fifty-six percent (92 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (up 2 points). Thirty-three percent of owners reported few qualified applicants for their open positions (unchanged) and 23 percent reported none (up 2 points). Labor quality is the most frequently identified business problem (23 percent), edging out inflation for the top spot.

CAPITAL SPENDING

Fifty-five percent reported capital outlays in the last six months, up 2 points from June. Of those making expenditures, 38 percent reported spending on new equipment (up 1 point), 22 percent acquired vehicles (up 1 point), and 15 percent improved or expanded facilities (up 1 point). Eleven percent spent money on new fixtures and furniture (up 3 points) and 6 percent acquired new buildings or land for expansion (unchanged). Twenty-seven percent plan capital outlays in the next few months, up 2 points from June.

SALES AND INVENTORIES

A net negative 13 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, down 3 points from June. This was the lowest reading since August 2020. The net percent of owners expecting higher real sales volumes improved 2 points to a net negative 12 percent. The net percent of owners reporting inventory gains was unchanged at a net negative 3 percent. Not seasonally adjusted, 14 percent reported increases in stocks (unchanged) and 14 percent reported reductions (up 1 point). A net negative 4 percent of owners viewed current inventory stocks as “too low” in July, unchanged from June. By industry, shortages are reported most frequently in retail (15 percent), transportation (14 percent), manufacturing (11 percent), and services (9 percent). Shortages in construction (6 percent) have been reduced because home sales have slowed dramatically due to higher interest rates. A net negative 2 percent of owners plan inventory investment in the coming months, up 1 point from June.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 38 percent reported raising compensation, up 2 points from June. A net 21 percent plan to raise compensation in the next three months, down 1 point from June. Ten percent cited labor costs as their top business problem, up 2 points from June. Twenty-three percent said that labor quality was their top business problem (down 1 point). The frequency of reports of positive profit trends was a net negative 30 percent, down 6 points from June. Among owners reporting lower profits, 30 percent blamed weaker sales, 19 percent blamed the rise in the cost of materials, 18 percent cited labor costs, 9 percent cited lower prices, 5 percent cited the usual seasonal change, and 4 percent cited higher taxes or regulatory costs. For owners reporting higher profits, 44 percent credited sales volumes, 34 percent cited usual seasonal change, and 9 percent cited higher selling prices.

CREDIT MARKETS

Three percent of owners reported that all their borrowing needs were not satisfied (up 1 point). Twenty-five percent reported all credit needs met (down 2 points) and 62 percent said they were not interested in a loan (up 2 points). A net 6 percent reported their last loan was harder to get than in previous attempts (unchanged). Four percent reported that financing was their top business problem (up 2 points). A net 23 percent of owners reported paying a higher rate on their most recent loan, down 1 point from June. The average rate paid on short maturity loans was 8.5 percent, 0.7 of a percentage point below June’s highest reading since June 2007. Twenty-seven percent of all owners reported borrowing on a regular basis (down 1 point).

INFLATION

The net percent of owners raising average selling prices decreased 4 points from June to a net 25 percent seasonally adjusted, the lowest since January 2021. Twenty-one percent of owners reported that inflation was their single most important problem in operating their business, down 3 points from last month and 13 points lower than last July’s highest reading since 1979 Q4. July’s reading was the lowest since November 2021. Unadjusted, 14 percent (up 2 points) reported lower average selling prices and 40 percent (down 3 points) reported higher average prices. Seasonally adjusted, a net 27 percent plan price hikes (down 4 points).

COMMENTARY

Waiting for Gadot: The long anticipated, predicted, recession is nowhere to be seen (almost). Recessions can start quickly (2020 shutdown) and end quickly (2020 reopening). Or they can start slowly, for example, due to opposing forces like expansionary fiscal policy vs. contractionary monetary policy. The Fed staff (not FOMC) has changed their recession forecast to a “slowdown.” There is more talk about a “soft landing” and less of a recession. The shifting outlook is often confusing but even less clear, is can the Fed reach its 2% inflation target (PCE deflator) without a significant slowdown in economic activity (e.g., slower wage cost growth)? The manufacturing sector is clearly slowing, soft all year (ISM) but services are doing well (ISM). Business investment is solid (lots of government incentives), and housing is ignoring 7% mortgage rates.

The labor market seems to be the driving force on the growth side. The last jobs report was solid, but most of the jobs created were in the public sector, not due to private sector growth. So public sector employment grew, but producing what? What, for example, will 50,000 new IRS workers add to GDP other than their government (taxpayer financed) wages? Those wages are spent, providing support for consumer spending, which was the driving force behind second quarter growth. But what was produced for us to buy? Forty-seven percent of the growth in GDP came from business investment in plants and equipment, residential construction, and inventories, matching the contribution of consumers. Nineteen percent was produced by government purchases (like defense). The trade deficit subtracted 11% (GDP measures income and output produced domestically, exports a + but imports a -). Outlays like Social Security payments are transfers of money from one person (taxpayer) to another (consumer) and don't count. A large chunk of the investment growth was funded by government subsidies (e.g., Chips Act, EV subsidies) and huge cost of living adjustments supported consumers, not strong private sector performance.

Some consumers (the older ones) received big income increases from government indexing, over 8 percent. However, millions of consumers will soon start repaying student loans rather than spending the money on goods and services. Small firms are already experiencing weakening sales (20% higher, 27% lower) and are still trying to manage cost increases (e.g., higher wages, increased regulations, etc.). The credit rating of US debt was downgraded by Fitch. The cost of servicing the U.S. debt is rising rapidly as newly issued debt with higher interest rates replaces old expiring bonds, nearing \$1 trillion annually. This will crowd out other government spending (like defense). Add the political uncertainty and small businesses, especially new ones, face an exceptionally challenging environment over the next two years.

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	5
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	6
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	7
If higher or lower, what is the most important reason?	7
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	8
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	8
How are your average selling prices compared to three months ago?	9
In the next three months, do you plan to change the average selling prices of your goods and/or services?	9
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	10
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	10
Do you have any job openings that you are not able to fill right now?	11
In the next three months, do you expect to increase or decrease the total number of people working for you?	11
Over the past three months, did you change the average employee compensation?	12
Do you plan to change average employee compensation during the next three months?	12

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Are...loans easier or harder to get than they were three months ago?	13
During the last three months, was your firm able to satisfy its borrowing needs?	14
Do you expect to find it easier or harder to obtain your required financing during the next three months?	14
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	15
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	15
During the last three months, did you increase or decrease your inventories?	16
At the present time, do you feel your inventories are too large, about right, or inadequate?	16
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	16
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	17
If [your firm made any capital expenditures], what was the total cost of all these projects?	18
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	18
What is the single most important problem facing your business today?	19
Please classify your major business activity, using one of the categories of example below	20
How many employees do you have full and part-time, including yourself?	20
