

Windows 7 & Windows Server 2008 End of Support: Are you prepared?

Windows 7 is now 14 years old

What's Windows 7 EOS?

After January 14, 2020, Windows 7 will continue to start and run, but users will no longer receive updates or **support**—including new security updates, non-security hotfixes, free or paid assisted support options, and online technical content updates—from Microsoft.

PCs running Windows 7 after January 14, 2020 should not be considered protected. It is important that users migrate to a current, supported operating system such as Windows 10 so they can receive regular security updates to help protect their device from malicious attacks.

Windows 7 EOS is a great time to transition to modern Windows 10 devices

What's at Risk?

- No more security updates or hotfixes
- Compliance: PCI/HIPAA/SOX/Etc. **RISK**
- Fines by regulating entities (Per Incident/Based on organization size)
- Exposure to cyber attacks
- Vulnerable to sophisticated ransomware & phishing
- No longer "If", it's "when"
- Higher operating costs

Weighing your options

In 10 years of innovation, so much has changed.

On-premises

Hybrid

Cloud

Upgrade Now

To the latest version of Windows Server and gain the performance, security, and mobility benefits on-premises.

Migrate to the cloud on your terms

With the latest version of Windows Server you can remain on-premises or in hybrid environments until you are fully prepared to migrate.

Upgrade to the latest Windows Server

Get faster performance, better security, and more storage by upgrading to the latest Windows Server.

Performance

Optimize operations, build sales, and prepare for the future with enhanced performance and increased storage.

Security

Secure and protect your data, stay ahead of emerging threats, and help meet regulatory and compliance demands.

Innovation

Move to the cloud on your own terms with modern servers and a cloud-connected operating system to ensure the continuity and flexibility you need to prepare for the future.

Windows 7 & Server EOS

- After January 2020, you may be at risk
- It's long overdue for an upgrade (Decade)
- Modernizing hardware & software is crucial to business success
- Opportunity to have modernization conversations with Dell

NFIB and Dell have teamed up to offer members assistance with their computer and technology needs.

For more information, visit NFIB.com/Dell or call 800-757-8442 and state the NFIB Member ID #34133015.
